

The all-in one cream for skin moisturization,  
protection and total care

- There are two types of vitamin A: **retinoids** (preformed vitamin A) and **carotenoids** (proformed vitamin A)
- Skin is a retinoid-responsive organ, able to readily absorb vitamin A when applied topically
- Vitamin A is important for the creation and repair of skin cells

## Vitamin A

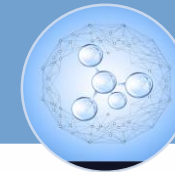

- Polyunsaturated fats, a type of fat body can't make
- Improve skin barrier function, sealing in moisture and keeping out irritants
- Protect against dry, red, itchy skin

## Omega 3,6

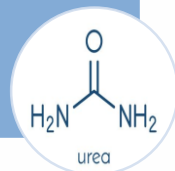

- Substance that is naturally produced by body
- Retains water to keep tissues well lubricated and moist
- Promotes Healthier, More Supple Skin
- Helps wounds heal faster by regulating inflammation levels

## Hyaluronic Acid

- Component of urine
- Increase in skin's water-binding capacity
- Speeds up the renewal of skin cells, which keeps skin looking healthy and youthful
- Skin exfoliation

## Urea

- Provides powerful antioxidant protection
- Protects from irritations
- Increases skin elasticity

## Vitamin E

- Soothe from irritations
- Improve the skin's ability to preserve moisture

## Allantoin & Panthenol

## DAILY MOISTURIZING CREAM

100g

**An oil-in-water emulsion for skin moisturization, protection and total care.**

It improves the texture of dry & scaly skin while protecting it, from harmful environmental factors (cold, heat, air pollution). Regulates the lipid & moisture content of the skin, rendering it soft and elastic.

### Ingredients & Benefits:

- **The combination of Vitamin A and omega 3, omega 6 Fatty Acids:** reinforces the outer layer of the skin, improves skin moisture and reduces dryness, rendering the skin, smooth and soft.
  - **Vitamin E:** Antioxidant protection | Preserves skin elasticity
  - **Hyaluronic Acid:** Enhances skin elasticity
  - **Urea:** Improves Skin Barrier Function
  - **Allantoin & Panthenol:** Soothing action | Improve skin's ability to preserve moisture
- ✓ Dermatologically tested
